Industries We Serve

& PRODUCTS WE SUPPORT

We Help Produce Items Used Every Day

HOW WE DO IT

We are an Engineering Design Firm that Fabricates Turn-key Process Systems

CUSTOMER JOURNEY

EPIC takes you from idea to final product by following these steps of our design build engineering process. Each step in your journey is carefully project managed and integrated to achieve your goals, without exceeding your budget.

SYSTEMS & SOLUTIONS We Offer

You have complex process manufacturing issues... **We bring value at every step.**

DESIGN/BUILD SERVICES

Solutions for greenfield/new build process systems, brownfield and/or plant expansions, pilot plants (process development and/or scaleups).

- Stage gated development (concept to startup)
- Single point of project ownership
- Modular installation tactics

STORAGE & TRANSFER

Optimize material storage and minimize contamination, spills, evaporation, and exposures.

- Bulk raw materials (tank farm)
- Pipe racks
- fluid transfer/pump skids
- Automated tote-to-tote transfer skids
- Temperature controlled storage solutions

MIXING & REACTING

Experience consistent, higher quality product, & improve efficiency & product fulfillment with reduced human capital.

- Inline blending/continuous blending
- Batch mixing
- Batch reacting
- Liquid/liquid
- Solid/liquid (powder additions)

LATE PRODUCT DIFFERENTIATION

Expand & diversify product offering & rapidly respond to dynamic consumer preferences without sacrificing quality.

- Late differentiation solutions including fragrances, colorants, and enzymes

DISTILLATION/SEPARATION

Improve quality of product & purity of raw materials while meeting sustainability goals.

- Thermal distillation
- Vacuum distillation
- CO2 capture
- Solvent recovery

CIP/SIP

Be more efficient & cost effective, & increase product & employee safety.

- Centralized
- Local

UTILITIES

Ensure continuous, reliable operation, quality production, & meet cGMP.

- Power
- Heating & cooling
- Heat transfer skids
